Matthew Khouzam

Product Manager / Head of Montreal Experience Studio / Developer
at Ericsson - Board of Directors Eclipse Foundation
Montreal, Quebec, Canada

Summary

Performance engineering, Software tracing, Data Visualization.

Experience

Ericsson

15 years

Head of the Montreal Experience Studio

August 2024 - Present (1 year 2 months)

Montreal

I am heading the Montreal Experience Studio (Innovation Garage)

- * Foster inter-departmental collaboration
- * Showcase Montreal site achievements
- * Provide a proper location for development between academic and industrial partners
- * Provide a platform for next-generation members to participate in knowledge sharing activities.

Product Manager

February 2021 - Present (4 years 8 months)

Montreal, Quebec, Canada

- * Manage requirements and specifications of Trace Compass and the Theia platform.
- * Interact with open source foundations representing Ericsson's interests.
- * Design roadmaps
- * Continue delivering as a software developer/architect
- * Work on compliance for FOSS 3PP

Senior Software Developer

January 2013 - July 2022 (9 years 7 months)

Montreal

Software Developer working on Trace Compass. the open source Eclipse tracing plugin.

Co-Lead on Trace Compass incubator.

Specialization:

- * Parsers
- * UI prototypes
- * Performance engineering
- * Devops
- * Coordinating R&D efforts
- * Marketing

Research Associate

2010 - January 2013 (3 years)

Implement java plugin for eclipse to view traces.

Provide an link between the research team at l'Ecole Polytechnique and the development team at Ericsson.

Supervising interns.

Working with with other teams in Montreal and Sweden.

Eclipse Foundation

Director

April 2022 - Present (3 years 6 months)

* Directors have a fiduciary responsibility to the Eclipse Foundation. In brief, this means that they must base their decisions on the needs of the Eclipse Foundation before those of either themselves or their employer.

* In terms of time requirements, the Board meets once a month for a one-hour conference call. It also meets face-to-face three times per year, typically in March, June, and October.

* I represent the needs of eclipse committers within the board of directors to make sure that this voice is heard.

Vanier College

Teacher

January 2010 - December 2010 (1 year)

Taught various courses including introduction to computers and C#.

Polycor Georgia Marble, Inc.

Embedded engineer

June 2009 - November 2009 (6 months)

Worked as an embedded engineer on an interactive catalog system.

Designed both hardware and software libraries.

Designed UI Toolkit for Windows CE.

VYV corporation

Co-design Research Engineer

July 2008 - May 2009 (11 months)

Development of new products using computer hardware, circuit design, PCB Routing, and Real Time Computer Vision.

Stage dressing applications.

CAE inc.

Software Developer

April 2006 - June 2008 (2 years 3 months)

Worked on GPU drivers, writing support tools and fixing shader bugs.

Support tools.

On site debugging.

Université de Montréal - Ecole polytechnique de Montréal

Cadre Special

January 2005 - April 2006 (1 year 4 months)

I worked in a team to design a robot for a first year class of computer engineering. This required hardware and software designing. Testing on a 3rd parties and cost analysis of the hardware.

École Polytechnique de Montréal

Cadre Special (chargé de lab)

2006 - 2006 (less than a year)

Taught course I designed where students build a robot and have them compete as an end of year project.

MegaPC Inc

Sales Rep / Technician

July 1998 - November 2001 (3 years 5 months)

Assembled and sold computers

Vega Strike (open source video game)

3D Artist (Volunteer)

May 2000 - August 2000 (4 months)

Designed 4 Ships for an Open Source 3D game back in 2000, 3D modelling done in 3ds max 3.0 and fixed by manually editing DXF files. Game balancing done. Each ship had a unique look and feel consistent with its role.

* The Longhaul - Medium capacity freighter designed to fly long missions.

- * The Puma - Aging space superiority ship that needed to stay due to budget issues.
- * The Katar - Interceptor, designed to punch hard and run away.
- * The Khanjarli - Recon fighter, made by the same manufacturers as the Katar, recycling design elements for a coherent look and feel.

Education

Université de Montréal - Ecole polytechnique de Montréal
Master's degree, Computer Engineering · (2003 - 2006)

Concordia University
B.Eng, Computer engineering · (1999 - 2003)

Brebeuf
Diplome des etudes collegiales, Pure and applied science · (1990 - 1998)

Cours d'apnee :)
